

Task 1 : Create a GIT repository named as your enrollment number. Create folder in your repository named as Assignment_1 and Assignment_2.

Prepare a file which contains each step of this task.

- **So here's the steps of creating a repository on GITHUB.**

1. First of all open GITHUB on any browser you use daily and search for GITHUB sign-up page. Sign Up with your personal email id.
2. After that, on the main page of GITHUB there is option for creating new repository, click that and you will go on

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner * 2301031800180-UditPatel / Repository name *

Great repository names are short and memorable. Need inspiration? How about [supreme-fiesta](#) ?

Description (optional)

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:

☐ Add a README file
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore
.gitignore template: None

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

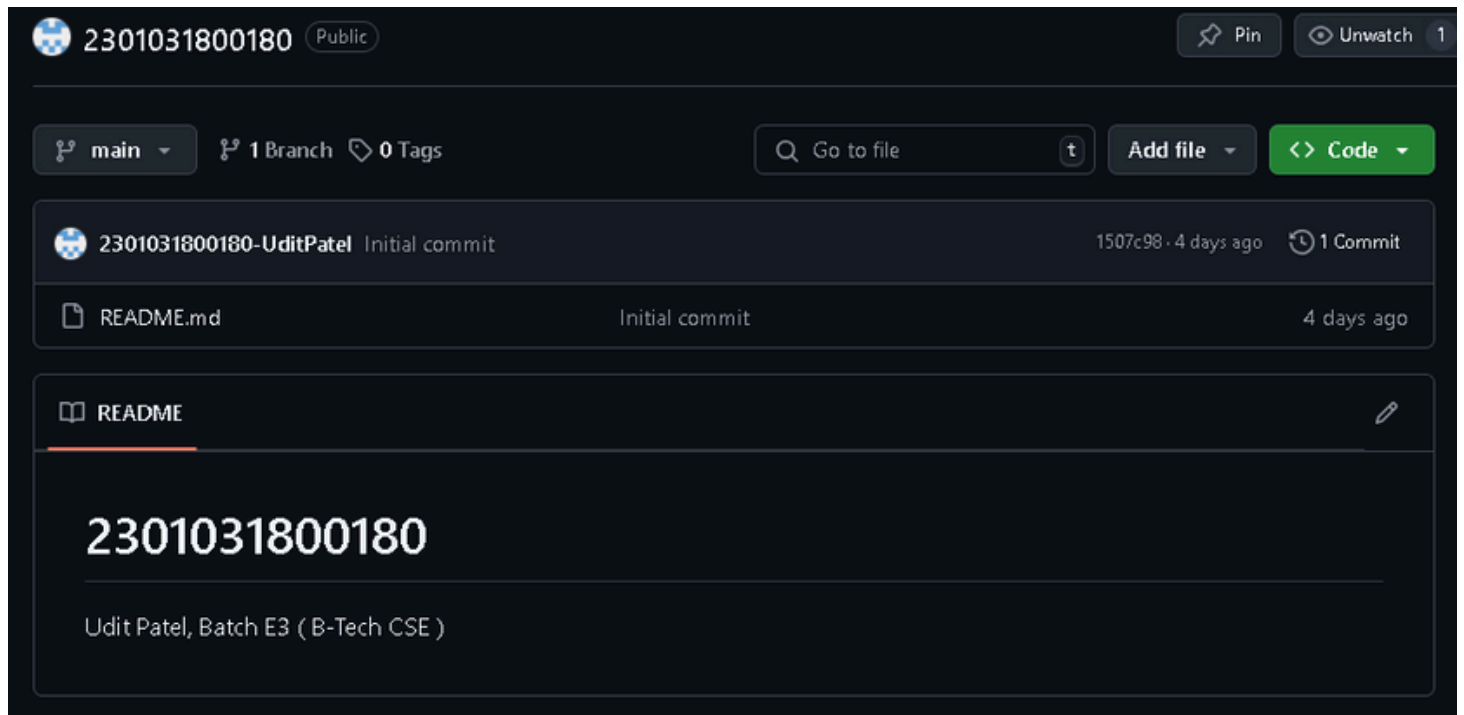

Choose a license
License: None

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

ⓘ You are creating a public repository in your personal account.

[Create repository](#)

3. Here, on this page give name of repository and you can also add description (it is optional). Then visibility set on public and add a README file too. Then Click Create Repository.

4. It will create this type of repository. now click on Add File option and click on upload file option. In your computer make to folder with name ASSIGNMENT_1 and ASSIGNMENT_2. Upload this to folder to repository and you good to go.....
